## When the Insects' Home Invasion Begins

**Fight Back With  
FlyWeb® Fly Light...**

**We'll Stop Them DEAD!**

# Insects Are Always Looking For A New Home

Nothing is more frustrating than the invasion of a variety of household pests in your home. While bugs always come in through open doors and windows, these seasonal invasions occur as two of the more popular - cluster flies and Asian beetles - look for a home for the winter or are leaving to go back outside for the summer.

## Fight Back With FlyWeb® Fly Light

We all have used a variety of weapons to fight off these irritating pests, but we just aren't winning the battle. Now, the FlyWeb® Fly Light will fight the seasonal invasion of Asian beetles and house flies!

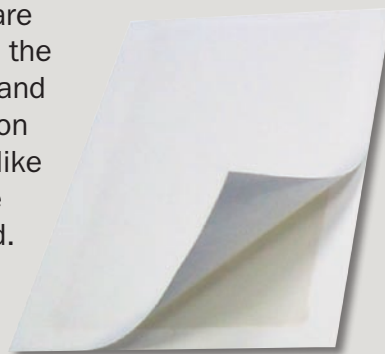

... Plus, the FlyWeb® FlyLight will continue to fight the battle of any flying insects that invade your home and will help rid your life of these irritating pests year round.

## FlyWeb® Fly Light Traps Annoying Pests

The FlyWeb Insect light is designed for indoor use in residential homes or wherever there are flying household pests. Its compact size makes it perfect to hide while it still does the job of ridding your house of flying pests. All you need is an electrical outlet - plug it in. Remove the protective coating on the adhesive board, insert it into the unit and the trap is set.

The FlyWeb attracts flying insects by using an energy-efficient 9-watt UV light. Flying insects are drawn to the UV light and trapped on the web-like adhesive glue card.

Removal of protective coating.

9-watt energy-efficient UV insect lamp

Easy to replace adhesive glue card

Part #: FW-9

UL approved and easy to use. Just plug into any 110V outlet. No tools required.
